TeleSoftas

Practical task for QA position in TeleSoftas Solutions department

Create a GIT repository and provide all the answers there

Task 1

Write an autotest for website using selenium framework with python or javascript

Using chrome navigate directly to https://www.tiketa.lt/EN/search and follow the steps:

      1) Write `THE HAMLETMACHINE` in Caption field

      2) Select `Artūro Areimos teatras` event place

      3) Choose dates `2022-11-01 - 2022-11-12`

      4) Press `Search` button

      5) Press `Buy` button on "`THE HAMLETMACHINE`" event

Task 2

Why does print_list() not correctly print out the elements a_list?

```
def print_list(a_list):
    for i in range(1, len(a_list)):
        print('Element {} = {}'.format(str(i),str(a_list[i])))

a_list = [1, 2, 3, 5, 7, 9]
print_list(a_list)
```

Task 3

Postman task:
1. Login to quizmart
2. Get quiz collections list
3. Create a new collection with 1st 10th and 15th result of quiz list

Try to use all the best practice for your scripts

baseUrl: https://staging-api.quizmart.io

Authentication endpoint and schema: POST /api/v1/auth/login
```
{
  "email": string,
  "password": string
}
```

Collection list endpoint : GET /api/v1/collections

Create new collection endpoint and schema: POST /api/v1/collections
```
{
  "quizIds": [ numb  ],
  "title": string
}
```
